

# - MEZCAL - AMORES®

## TECHNICAL NOTES

**Agave:**  
Cupreata (Papalote)

**Growth Period:**  
13 years

**Region:**  
Tixtla, Guerrero

**Oven Type:**  
Conical Earth Oven

**Mill Type:**  
Egyptian mill

**Fermentation Vessel:**  
Pine Wood

**Still Type:**  
Cooper Pots

**ABV:** 41%

## MORE THAN A COMPANY, IT'S A PHILOSOPHY

Mezcal Amores is a company built through love; love for the sun, for the land and the people who work it, and most of all, love for Mexico and its sacred plant - the agave.

We believe in a better world, developing a holistic model "From Seed to Sip" that connects, inspires, and defines what makes us different in the world of mezcal.

In honor of our philosophy, Mezcal Amores allocates up to 20% of the net sale of each bottle to develop internal initiatives promoting social and environmental responsibility.

## WHAT MAKES MEZCAL AMORES CUPREATA DIFFERENT:

**Artisanally made in Oaxaca:** \_\_\_\_\_ 

We handcraft our mezcal with local producers - Maestros Mezcaleros - in the town of Tixtla on the mountain slopes of the Rio Balsas.

**100% Natural Fermentation:** \_\_\_\_\_ 

All fermentation occurs naturally with no sulfites in open-air vats, utilizing wild yeast native to the environment.

**Agave Cupreata:** \_\_\_\_\_ 

Cupreata is also known as Papalote, which signifies butterfly, because of the way its leaves (Pencas) open up to the sun. This sacred plant grows within the higher jungles 4,000 to 6,000 feet above sea level, in a semi-humid climate. It is a wild agave that absorbs solar energy 13-15 years before it matures.

**Tasting notes:** \_\_\_\_\_ 

Subtly perfumes the nose with notes of pumpkin seeds, leather, cacao and other tropical aromas. Cupreata is bold, bright and herbaceous, leaving a fresh finish of pepper and spice on the mid-palate.

**Awards:** \_\_\_\_\_ 

Amarás Cupreata took a gold medal at the Bruxelles "Concours Mondial" and the San Francisco World Spirits Competition. It then took double Gold at the WSWA Tasting Competition.

**100% Sustainable** \_\_\_\_\_
